

CLIMATE CONTRIBUTION

MIKO Trafokerne Jahresmenge 2025 supports the following UN goals for sustainable development:

MIKO Trafokerne Jahresmenge 2025

Participant ID: DE-4054-1209

Valid until: 09.12.2026

This certificate guarantees that the reported quantity of 508 tons CO₂ has been calculated according to Greenhouse Gas Protocol Standard, scopes 1, 2 and 3. The resulting emissions have been saved in Gold Standard tested climate projects.

MIKO Trafokerne Jahresmenge 2025 has acquired shares (certificates) in climate protection projects corresponding to the calculated volume of CO₂ and therefore plays a transparent part in the realisation of the projects. This ensures that the company compensates for its own CO₂ emissions, and thus scales back the rise in global warming.

The projects have been certified, and the issue and closure of the certificates is registered transparently.

MIKO Trafokerne Jahresmenge 2025 is therefore a voluntary participant in emissions trading, and thus makes a contribution to maintaining a viable environment by reducing the emissions of greenhouse gases. The holder of this certificate makes a sustainable contribution to the commitment to tackle global warming.
